

Report of the AUS President 2/6/2018

Technology

The OPUS reloading stations have arrived, working on getting McGill to install them now on the Leacock computers.

Presidents' Roundtables

Had a presidents' roundtable last week, very productive albeit with slightly low attendance. Was good to discuss avenues for collaboration and discuss how we can improve table bookings for departments.

Elections

Nomination period opens tomorrow morning!!! Information session happening Thursday evening, all very exciting news! If your department is planning on having an election that is not through the SimplyVoting software, please request an exception in writing to Rebecca and myself before next Friday at 6pm.

HR

Sec Gens are working on tweaking the hiring platform and getting it up and running so that we can start loading in the list of positions for next year. Going to start trying to use more data when it comes to hiring.

Laptop Lending

Put out a survey on the new AUS polling software (which all of you also have access to) regarding the laptop lending program. At time of writing (Sunday morning), we've got a 4% response rate from the entire Faculty, and some really interesting numbers. I've attached a report in the appendix for you to peruse if you wish.

Miscellaneous

Attended a few WYBA events, enjoyed them thoroughly and learned a lot, shout out to Alice for doing an amazing job on that!

Audit

Have signed off on the audit, should be getting final stuff soon from them. Was unable to attend the SSMU Presidents' Roundtable due to it being scheduled in the middle of the day Saturday.

Respectfully Submitted,

Erik Partridge, AUS President
