Report of the Vice President Internal

Items:

- Met on a case by case basis with a lot of departmental execs re: equity training

- Scheduled make up equity training for those exec eligible

- Chasing down final departmental packages, some departments have just elected their exec and I will be following up with them on training, package etc.

- The mysterious set of keys on my desk has finally been accounted for; took a trip to 3434 mctavish and have found spare keys to some departmental rooms, also have access to room 401

- Further discussions to be had on that space, some departments have priority for new spaces, AUTS also looking for spaces -- potential for a room swap/sharing schedule if departments agree

- Also found the key to the potential photography development room?? → asking where exactly this room is and if it can be converted.

- Back portion of computer lab in Arts Lounge to be converted once Frosh items are moved → re:new spaces perhaps temporarily moving these items into the rooms until we can figure out who is going where.

- Overall, still a lot of attendance during my office hours, which is great because I can speak to you in person, and hours and hours of s/q work.

AUSEC
- Commissioners signed new contracts, (slight changes)
- Weekly meeting set, having my commissioners review previous greenguides and begin to orient themselves with past initiatives
- They will be coordinating the AUSEC council meetings, hoping to have the External commissioner redesign some of the social media (FB, Insta) to be more up to date

- Going to book a meeting with McGill sustainability office re: new projects, materials, joint efforts.

FEARC:
- The FEARC President will be the FYC representative as the VP External role has to attend Council.
- re-opening applications online for Comms, Internal and External, email going out tmo.
- FYC meetings have been set and will be liaising with SSMU VP Internal

Respectfully Submitted,

 Kevin Zhou
